COURSEWORK

UNDERGRADUATE

Operating Systems

Data Structures and Algorithms

Design and Analysis of Algorithms

Computer Networks

Programming Paradigms

Database Management Systems

Computing Machinery

Advanced Programming Techniques

Human-Computer Interaction

Web Based Systems

SKILLS

TECHNICAL SKILLS

Proficient with:

Java • Python • C++ • C

HTML/CSS • PHP • Git •

Agile Development • JUnit

Familiar with:

Haskell • HTML • CSS

JavaScript • Assembly

SQL • Prototyping • Reflection

SOFT SKILLS

Strong:

Leadership • Initiative

Resourcefulness • Bilingual

Communication (Fluent English and

Conversational Korean)

INTERESTS

Lifting • Hiking • Gaming • Sudoku

Cooking Korean Cuisine • Board Games

EXPERIENCE

ME ONSITE INC. | SOFTWARE DEVELOPER

Nov 2018 - Present | Calgary, AB

- Utilizing the **DirectShow** framework to create a replay program capturing and recording multiple live feeds simultaneously, allowing instant playback.
- Integrating graph filters using **GraphEdit** from the Microsoft DirectShow SDK to capture input.
- Increased the number of available inputs by **200%**.
- Introduced **git** as the main source of version control.

UNIVERSITY OF CALGARY | TECHNICAL SUPPORT

Nov 2018 - Present | Calgary, AB

- Work as both a technical support representative and a librarian.
- Support **200+** patrons daily in hardware, software and library issues in a fast-paced environment.

PROJECTS

LIBRARY MANAGEMENT SYSTEM | GITHUB

Winter 2019 | Calgary, AB

- Built a Library Management System application for Mount Royal University in **Java** with 5 other team members
- Implementing the front end component with **Java Swing**, we executed **100%** of user stories provided by the client throughout 4 iterations.
- Utilitized the unit testing framework **JUnit** to achieve over **90%** codebase coverage.

AMAZON PRICE TRACKER | GITHUB

October 2019 | Calgary, AB

- Created a 140-line personal Amazon scraper with **python** that sends an email when the item falls below a price.
- Used **stmplib** and **BeautifulSoup** libraries to learn about extracting HTML data and sending basic emails.

ARCADE GAME | GITHUB

WINTER 2017 | Calgary, AB

- Built a **Java** game based off classic game Tron from scratch.
- Implemented **Java AWT** for the front-end component.
- Manually used **white box testing** to achieve **80%** codebase coverage.

EXTRACURRICULAR

HONG KONG STUDENTS' ASSOCIATION | VICE PRESIDENT EVENTS

May 2019 - Present | Calgary, AB

- Led the events team to organize monthly events for the largest cultural club on campus (**700** current members), such as Clubs Week, Welcome Back Party, and Club Retreat.
- Assign roles and responsibilities for other executives during events.
- Attend bi-weekly club meetings to discuss and organize events with **17** other executives.
